SUMMARY

Software Engineer with 5+ years of professional experience building and maintaining production web applications using Next.js, React, TypeScript, and Node.js. Experienced in designing scalable frontend architectures, integrating APIs and databases, optimizing Core Web Vitals, SEO, and accessibility, and managing production deployments. Proficient in AI-assisted development workflows using Claude Code and modern development tools to accelerate delivery while maintaining code quality.

WORK EXPERIENCE

Frontend Web Developer

June 2025 – Present

Qubic Ball

Medan, Indonesia (Hybrid)

- Build and maintain scalable web applications using Next.js, React, TypeScript, and modern frontend architecture patterns.
- Drive technical decisions for frontend implementation, performance optimization, and maintainable code organization.
- Collaborate with backend engineers to integrate REST APIs, authentication flows, and database-backed business features.
- Contribute to system design discussions, translating product requirements into scalable technical solutions.
- Improved website performance and Core Web Vitals by optimizing rendering strategies, asset delivery, and bundle size.
- Diagnosed and resolved deployment and server-related issues, ensuring stable production environments and reliable releases.
- Utilize AI-assisted development workflows with Claude Code to improve productivity and accelerate delivery.
- Built reusable logging utilities using Pino for consistent client-side and server-side application diagnostics.

Web Developer

January 2022 – May 2025

Bold and Underline

Medan, Indonesia

- Developed and maintained client websites and web applications using Next.js, React, and custom CMS solutions.
- Built responsive, SEO-friendly interfaces with strong focus on performance and accessibility.
- Implemented interactive user experiences using Framer Motion and modern frontend techniques.
- Designed resilient frontend integrations that handled API failures, loading states, and edge-case user flows.
- Managed production deployments on Ubuntu servers using Nginx, PM2, Git, and deployment pipelines.
- Worked directly with stakeholders to translate business requirements into technical solutions.

Freelance Web Developer

January 2021 – January 2022

Self-Employed

Indonesia

- Developed custom websites and web applications for small businesses and organizations.
- Built responsive user interfaces using HTML, CSS, JavaScript, Bootstrap.
- Collaborated directly with clients to gather requirements and deliver tailored solutions.
- Maintained, updated, and optimized existing websites for performance and usability.
- Assisted with deployment, hosting configuration, and technical support.

Junior Web Developer (Intern)

March 2021 – May 2021

Digital Innovation Lounge

Medan, Indonesia

- Developed reusable website templates using Bootstrap, JavaScript, and jQuery.
- Collaborated with developers and designers on PHP-based web projects.
- Participated in testing, debugging, and implementation of client requirements.
