SUMMARY

Frontend-focused Web Developer with **5+ years of experience** building responsive, high-performance websites using **Next.js, React, Typescript and TailwindCSS**. Skilled in crafting polished UIs with **Framer Motion** animations, optimizing for speed, SEO, and accessibility. Experienced with backend technologies and deploying production-ready apps on Linux servers and collaborating across teams to deliver scalable solutions.

WORK EXPERIENCE

Frontend Web Developer - Qubic Ball - Medan, Indonesia (Hybrid) | **June 2025 - Present**

- Design and build scalable, production-grade web applications using modern React and Next.js architecture.
- Lead frontend architecture decisions with a focus on modularity, performance optimization, and long-term maintainability.
- Deliver accessible, responsive, cross-browser interfaces aligned with UI/UX systems.
- Optimize rendering strategies, bundle size, and API integrations for high-performance user experiences.

Web Developer - Bold and Underline - Medan, Indonesia | **January 2022 - May 2025**

- Built and maintained dynamic websites for clients, delivering fast, responsive interfaces with Next.js and custom/Headless CMS integrations.
- Implemented micro-animations and interactive effects using Framer Motion, enhancing user engagement and modern UI feel.
- Optimized applications for SEO and Core Web Vitals, ensuring top performance across devices.
- Deployed and managed production environments on Ubuntu servers with pm2 and Nginx, ensuring stability and uptime

Junior Web Developer (Intern) - Digital Innovation Lounge - Medan, Indonesia | **March 2021 - May 2021**

- Developed website templates with Bootstrap and jQuery.
- Collaborated in a team to deliver a PHP-based website project

SKILLS

- Frontend: HTML, CSS, JavaScript, TypeScript, Next.js, React, TailwindCSS, Framer Motion, Shadcn UI, Zod, React Hook Form, Zustand/Jotai
- Backend & Databases: Node.js, Express, REST/GraphQL APIs, MySQL, PostgreSQL, MongoDB
- Infrastructure & Tools: Git, GitHub, Redis, Socket.io, Docker, Ubuntu, Nginx, Figma
- Soft Skills: Problem-solving, fast learner, teamwork, critical thinking

EDUCATION

D3 Informatics Management (GPA: 3.75/4.00) - State Polytechnic of Medan | **2018 - 2021**

PROJECTS

1. The Khourt - Court Booking Web App

Overview

A mobile-first court booking platform enabling users to browse, schedule, and manage sports court reservations seamlessly.

Key Features

- Real-time court booking and scheduling system
- Multi-level booking flow (courts, trainers, classes)
- Integrated API-based data handling across features
- Responsive mobile-first UI based on Figma design

Tech Stack

- Next.js, TypeScript
- Tailwind CSS
- REST API integration
- React (Hooks, Component Architecture)

Key Contributions

- Translated Figma designs into a production-ready frontend
- Collaborated with UI/UX designer and backend developer to integrate APIs
- Implemented core booking flows and UI interactions across the platform
- Ensured responsiveness and usability across devices

Highlights

- Built scalable frontend structure for multi-feature booking system
- Handled complex UI state and booking logic efficiently

- Demo: [Kortova](#)

2. Yayasan Perguruan Sultan Iskandar Muda - Company Profile & CMS

Overview

A modernized official website for an educational institution, featuring a custom CMS for dynamic content management.

Key Features

- Fully responsive company profile website
- Custom-built CMS for managing content, announcements, and publications
- Structured content system for scalability and maintainability

Tech Stack

- Next.js (App Router), TypeScript
- Tailwind CSS
- Custom CMS architecture

Key Contributions

- Rebuilt the entire website from scratch with modern technologies
- Designed and implemented CMS system for non-technical administrators
- Improved site performance, responsiveness, and maintainability
- Structured content system for long-term scalability

Highlights

- Delivered a full-stack-like solution (frontend + CMS logic)
- Focused on maintainable architecture and content flexibility

Link

3. Digital Registration System — QR Ticketing & Check-in Platform

Overview

A high-performance digital registration and on-site check-in system using QR-based ticketing, designed to handle real-time attendee validation for events.

Key Features

- QR-based ticket generation and validation system
- Real-time check-in with instant verification
- Admin dashboard for participant monitoring and control
- Efficient data handling for large attendee volumes

Tech Stack

- Next.js, React
- Node.js
- REST API integration
- QR Code generation & scanning

Key Contributions

- Developed core frontend system for registration and check-in flows
- Implemented QR validation logic for fast and reliable scanning
- Integrated frontend with backend APIs for real-time attendee verification
- Optimized UI/UX for fast operation in high-pressure, on-site environments

Highlights

- Designed for high concurrency and real-time interaction
- Built under tight deadlines with focus on reliability and performance
- Reduced manual check-in process significantly through automation
